# Wyoming Topographic Recreational Map

## Synopsis

Topographic full color Wyoming state map is scaled at 1" = 12.5 miles. Elevation contours each 1,000 feet (color shaded each 2,000 feet at higher elevations) portray the general geography. Also shown are national forests, wilderness areas, campgrounds, parks, state game and fish areas, ski areas, mining districts, points of interest, and more. More roads are shown than on typical highway maps. Much printed information is also included. --This text refers to an out of print or unavailable edition of this title.

## Customer Reviews

I used the map as I rode the Trans-America trail through Colorado on my adventure motorcycle. It shows the main dirt roads clearly and all the campsites. I also used it while touring on my road bike, it has all the important information clearly presented. this is by far my favorite map product for the Rockies.

Exactly what I was looking for.

On our WY road trip this map was more helpful than the free WY state map we had used on a previous trip. Other tourists we assisted in route finding by showing them this map wanted to know where we bought ours and were very disappointed that it came from and that we couldn't just refer them to a nearby store. In WY we didn't come across this map so were glad we ordered it in advance.

The map is fine for a automobile use, it just needs more detail if you are going on any back roads. The back roads that are available to travel are what you need to see if you want to get the full picture of our great country!

We ordered this map for a backpacking trip in the Wind River Mountains. It was useful to have, showing all the major trails and landmarks.

These are great reference maps for generalized recreational activities. Not as detailed as a topo map, but still packed full of outstanding information. I have one for every state and I don't leave home without them.

These are great for planning motorcycle trips that venture off of the beaten path!

First let me begin with a little honesty: for 25 years I wasn't even sure if Wyoming was real. I kept seeing it on maps and Geography tests, but I figured maybe it was some sort of inside joke between teachers and cartographers. I had never met anyone from Wyoming, nor ever heard any bit of news from there, so I figured it must not exist. So I bought this map and went on a road trip to dispel the myth. And let me tell you: Wyoming should be renamed Funoming. The map is awesome. It not only has all four dirt roads in Wyoming perfectly mapped, but it also has a great informational guide that shows you the many places you may visit and fun facts about Wyoming. These Wonders of Wyoming include, "Best place to take a dump" (behind any of the trees), the "number of people who live in Wyoming" (0), and "Wyoming's biggest export" (air). During my road trip I visited many great places, such as "Tree #1" through "Tree #892,340,421,324," "Big Gray Rock," and "Litter that blew in from Utah." I never did meet anyone, but that might be because the place reminds me of Deliverance. I would absolutely, unequivocally recommend this map for anyone who wants to visit Wyoming because they really love trees, really hate people, or wanted to experience the only kind of boredom that Funoming can offer.
