# Critical Care Transport

## Synopsis

Welcome to the gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), and endorsed by the University of Maryland, Baltimore County (UMBC) and the International Association of Flight and Critical Care Providers (IAFCCP), *Critical Care Transport, Second Edition*, offers cutting-edge content relevant to any health care provider training in critical care transport. Like no other textbook in this market, the Second Edition thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the 2015 CPR/ECC Guidelines and the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients. New to the Second Edition: Sample fetal monitoring strips Updated information on transport choreography Enhanced information on capnography and troubleshooting transport ventilators A standalone chapter on patient safety Much more!

## Book Information

Paperback: 1018 pages

Publisher: Jones & Bartlett Learning; 2 edition (April 3, 2017)

Language: English

ISBN-10: 1284040992

ISBN-13: 978-1284040999

## Customer Reviews

I am aspiring to be a flight RN and have been searching hi and low for a book to help me learn ahead of time. It has the critical care drips like I've always dreamed of, which is actually extremely helpful for the ED! Just everything you could dream of....it'll take me quite awhile to get through!!! SO GLAD I BOUGHT IT!

The navigate tool is not available yet, so they extended it for 365 more days.... I wonder if they truly believe that it is going to take me that amount of time to pass the board test. Waste of money, just get a second hand one.

great

Very pleased with content in this textbook

Great book lots of useful information.
