World Without Cancer; The Story Of Vitamin B17

Synopsis

Mr. Griffin marshals the evidence that cancer is a deficiency disease - like scurvy or pellagra - aggravated by the lack of an essential food compound in modern man's diet. That substance is vitamin B17. In its purified form developed for cancer therapy, it is known as Laetrile. This story is not approved by orthodox medicine. The FDA, the AMA, and The American Cancer Society have labeled it fraud and quackery. Yet the evidence is clear that here, at last, is the final answer to the cancer riddle. Why has orthodox medicine waged war against this non drug approach? The author contends that the answer is to be found, not in science, but in politics - and is based upon the hidden economic and power agenda of those who dominate the medical establishment. This is the most complete and authoritative treatise available on this topic.

A clear and revolutionary insight into both the science and politics of cancer therapy. Dean Burk, Ph.D. Former Head of Cytochemistry. National Cancer institute --Dean Burk, Ph.D. Mr. Griffin has lifted the veil of mystery from Laetrile. Dr. Ernst T. Krebs, Jr. Discoverer of Vitamin B17 --Dr. Ernst T. Krebs, Jr. A milestone of careful research and penetrating analysis. John A. Richardson, M.D. Albany, California --John A. Richardson, M.D.

G. Edward Griffin is a writer and documentary film producer with many successful titles to his credit. Listed in *Who's Who in America*, he is well known because of his talent for researching difficult topics and presenting them in clear terms that all can understand. He has dealt with such diverse

subjects as archaeology and ancient Earth history, the Federal Reserve System and international banking, terrorism, internal subversion, the history of taxation, U.S. foreign policy, the science and politics of cancer therapy, the Supreme Court, and the United Nations. His better-known works include *The Creature from Jekyll Island*, *World without Cancer*, *The Discovery of Noah's Ark*, *Moles in High Places*, *The Open Gates of Troy*, *No Place to Hide*, *The Capitalist Conspiracy*, *More Deadly than War*, *The Grand Design*, *The Great Prison Break*, and *The Fearful Master*. Mr. Griffin is a graduate of the University of Michigan where he majored in speech and communications. In preparation for writing his book on the Federal Reserve System, he enrolled in the College for Financial Planning located in Denver, Colorado. His goal was not to become a professional financial planner but to better understand the real world of investments and money markets. He obtained his CFP designation (Certified Financial Planner) in 1989. Mr. Griffin is a recipient of the coveted Telly Award for excellence in television production, a Contributing Editor of *The New American* magazine, the creator of the Reality Zone Audio Archives, and is President of American Media, a publishing and video production company in Southern California. He has served on the board of directors of The National Health Federation and The International Association of Cancer Victors and Friends and is Founder and President of The Cancer Cure Foundation. He is also the founder and president of Freedom Force International.

I purchased this book as my father has advanced prostate cancer and I wanted to find out more about B17. I came across the potential benefits of B17 (laetrile / amygdalin) in the form of bitter apricot kernels through Ty Bollinger's book - *31 Day Home Cancer Cure* - *The 31-Day Home Cancer Cure* (an excellent read for anyone who has cancer or wishes to prevent cancer using alternative approaches). My father has been taking the bitter apricot kernels for the last 9 months and his PSA reading has dropped dramatically (165 to 13). Having said this there are numerous bad reviews about B17 and the bitter apricot kernels all over the internet (conventional view is that bitter apricot kernels don't work and are extremely dangerous as they release cyanide and can kill you in a 'high enough dose'). So my big questions were: 1. What is the scientific evidence for B17 and cancer treatment? 2. If it works, why is it not a recommended option offered by GPs and consultants? 3. Who else has taken bitter apricot kernels and what have their results been? How do these results compare to conventional treatments of surgery, radiation treatments, chemo or hormone treatments? 4. Ultimately (and my only purpose for reading this) - after researching things, do I still think taking bitter apricot kernels is doing my dad more good than harm? Should he continue with them? As part of my research, I bought this book, along with *Laetrile Case*

Histories – Laetrile Case Histories; The Richardson Cancer Clinic Experience, Cancer, Metabolic Therapy and Laetrile – Cancer, metabolic therapy, and laetrile: A case history, with discussion of clinical application and materials used, B15 The Miracle Vitamin – B15, Miracle Vitamin – and Vitamin B15 (Pangamic Acid) Properties, Functions and Use – Vitamin B15 (Pangamic Acid : Properties, Functions and Use). So how has this book helped me in my quest? I found this particular book to be extremely informative for several reasons: 1. This is the first time I have come across the theory that cancer is the result of a 'vitamin' deficiency - B17. (This is a very controversial theory and much disputed in medical circles). I say 'vitamin', as B17 is not a recognized / acknowledged vitamin by the FDA. 2. It explains the mechanism of how B17 works on cancer cells. In essence, it is true that bitter apricot kernels release cyanide - however, this is only true in the case of cancer cells, as they produce an enzyme that 'unlocks' the cyanide - and in fact it is this unlocked cyanide that kills the cancer cell. 3. Provides some interesting statistics on long-term survival of cancer patients using nutritional therapy Vs conventional cancer treatments, along with some anecdotal case histories. 4. Provides an insightful history on the politics of cancer treatment. It is really important to understand this, before passing judgment on whether alternative therapies work. If you know anyone who says "If it worked my consultant would have recommended it" - get them to read the second half of this book. In summary, this is a very well written book and a must read for anyone who has cancer, knows someone who has cancer or who wants to minimize their chances of getting cancer. I would recommend reading it cover to cover, rather than dipping in and out - as the chapters build on each other. Personally, I found it an easy and fascinating read. Of the books I have read, this was the best introduction to B17 and also one of the best on the politics of cancer treatments. (As an aside, Hoxsey Therapy: When Natural Cures for Cancer Became Illegal is an alarming first hand account of the politics of cancer treatment – Hoxsey Therapy: When Natural Cures for Cancer Became Illegal; the Autobiography of Harry Hoxsey, ND. For those that are interested, my conclusion (based on all of my research to date) is that my dad should continue with the bitter apricot kernels (he does about 25 per day in lots of 5 or 6 throughout the day) - and not only that, it has opened my eyes and I have started taking them myself as a preventative approach. I continue my research...

We live in a complex world, but how complex is it really? Most problems can be cured with a simple answer. Is Cancer an over complicated disease introduced to the human population that can be solved by simple instructions? Read on to find out for yourself. I recommend this book based on the following quotes... Monkeys and other primates at the zoo when given a fresh peach, or apricot will

carefully pull away the fleshy part, crack open the hard pit, and devour the seed that remains. Instinct compels them to do this even though they have never seen that kind of fruit before. These seeds are one of the most concentrated sources of nitrilosides to be found anywhere in nature. Page 58 "It is significant that one seldom finds cancer in the carcasses of the wild animals killed in the hunt. The creatures contract the disease only when they are domesticated by man and forced to eat the food he produces or the scraps from his table." Foods that are high in Nitriloside: Millet, Apricot and peach Page 60 An apple a day keeps the doctor a way... could have been more of an idle slogan... the apple seeds are high in vitamin B17. Page 61: And God said: Behold I have given you every herb-bearing seed upon the earth, and all trees that have in themselves seed of their own kind, to be your meat. (Genesis 1:29) Page 63: Chapter - The Ultimate Test The best way to prove or disprove the vitamin theory of cancer would be to take a large group of people numbering in the thousands, and over a period of many years, expose them to a diet of rich nitriloside foods, and then check the results. This surely would be the ultimate test. Don't believe a word I said - go find out what is true for yourself by reading the work of the author.

A great book about truth and the natural way to cure cancer. B17 is lacking in our nutrition, but is found in nature and in an abundance in Apricot seeds. Just like scurvy and other diseases - cancer is a VITAMIN DEFICIENCY and can be controlled! We just need to give our immune system the tools to do the job that it was created to do.

Son in law has been battling Cancer this has got good info

Every American should read this book.

In print since 1974 and no legal action. That has to indicate that this book is right on the money. I would recommend this book to all who are searching for the truth.

Excellent book. Originally borrowed from the library but wanted a personal copy to keep. Gives you a different perspective on cancer and research that's been going on for years.

Amazing.
