"The manual is very well-written and provides the fire service with an all-encompassing textbook that moves a person that is interested in the fire service to someone that is proficient with the knowledge and skills to become a firefighter."~Todd W. Haines, Fire Protection Engineer, Dallas/Fort Worth International Airport, TX"Material is presented in an easy to read intuitive manner backed up with a lot of photographs and diagrams showing how to do the procedures described. The text not only explains what to do, but why to do it~[and] does a good job of including updated information from the latest standards and technology."~Howard Sykes, Assistant Chief,

Lebanon Volunteer Fire Department, Durham, NC

I received the book as promised.

The handbook is very informative, gives a lot of detail, and has many illustrations. Great book!

The book was exactly the item that is needed for a class my Daughter and I are taking with the LFD. The delivery was faster than expected and we appreciate the experience of shopping with !!

A must need to become a firefighter and a company officer. This book teaches you the basic fundamentals of firefighting.

This was a good book, but wasn't the one I needed, please make sure that you need this one or the one that included emergency response. Everything was as described by seller just not enough due diligence on my part.
