Gerontology Nursing Case Studies: 100 Narratives For Learning

Synopsis

This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics. Score: 90, 4 Stars.-Doody's Medical Reviews

The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills. Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing

This is a terrific text that provides nurses and other health care providers [with] good basic information about clinical problems and challenges we face in providing care to older adults. It should be considered required reading in all undergraduate programs. From the foreword by Barbara Resnick, PhD, CRNP, FAAN, FAANP Professor, University of Maryland School of Nursing Sonya Ziporkin Gershowitz Chair in Gerontology

At the heart of this unique volume are 100 case studies of older adults that address nearly every issue-physical, mental, and psychosocial-that may confront health care providers who work with the aging population. These case studies, culled from contributors with several centuries' worth of combined nursing expertise, are designed to guide nursing students in the development of interventions that encompass both complementary and alternative health strategies. Exercises interspersed throughout each case study are designed to foster critical thinking and decision-making skills. These case narratives provide a holistic approach to problem solving in regard to political, ethical, and legal issues; loss and end-of-life issues; elder abuse; depression, addiction and suicide; self-esteem and family relationships; sexuality; age-related health issues; cognitive impairment; cultural diversity as it relates to aging; pain management; and sleep disturbances. The volume also addresses such contemporary psychosocial issues as gambling addiction, hoarding behavior, emergency preparedness, the aging driver, and long-distance caregiving. Key Features: Provides 100 evidence-based case studies Cultivates development of critical thinking and decision-making Features realistic, contemporary scenarios Designed for use across the gerontology nursing curriculum Geared for AACN and NLN Accreditation Organized according to the needs of actual clinical settings

I picked up this book to use as a supplement to a class I am teaching in Gerontology and have found it very useful. I have used the book to familiarize the students with situations that they have not encountered in the healthcare setting, as part of a group discussion and/or group project, as make-up work for a missed clinical day and as part of a scenario.

Just what I needed for resource...

This book was purchased to add supplemental material to college course work I teach. It should make the care of our senior citizens better.

It is a flimsy book with no academic benefits for students or nurse practitioner. I will never recommend this book to anyone. In fact, I will throw it away.
