Learning For The Love Of God: A Student's Guide To Academic Faithfulness

Synopsis

Most Christian college students separate their academic life from church attendance, Bible study, and prayer. Too often discipleship of the mind is overlooked if not ignored altogether. In this lively and enlightening book, two authors who are experienced in college youth ministry show students how to be faithful in their studies, approaching education as their vocation. This revised edition of the well-received *The Outrageous Idea of Academic Faithfulness* includes updates throughout, two new substantive appendixes, personal stories from students, a new preface, and a fresh interior design. Chapters conclude with thought-provoking discussion questions.

Customer Reviews

Our Christian university was exploring ideas and ways to help students avoid academic dishonesty by developing more proactive engagement in authentic learning. This book has that focus. It helps undergraduates strategize ways to stay motivated in studying and learning and how to be intentional in their college learning. It is written with humor and stories and would be enjoyed by high school

juniors and seniors as well as college freshmen.

Great gift for grads

Good condition

I enjoyed so much reading this book and I definitely recommend it to every freshmen student it is just amazing.

In the Christian world, many people have been advocating for a deeper faith in public or integrating faith in the marketplace. While in the comfortable study environment, we can learn how best to put our faith to the test. What about our schools and educational environments? Are they not marketplaces in themselves? From the most boring lectures to the most interesting classroom lessons, this book shows us that every class matters. In the words of the authors, two words summed up the whole book: "Academic Faithfulness." The authors have a common heritage: Geneva College with Opitz a professor and Melleby an alumnus. They begin by pointing out two erroneous expectations of college students. The first is the "beer and circus" which on the outside looks like fun and partying, but on a deeper level, is a distraction from academic faithfulness. The second is the "grades and accolades" expectation that sees academic success and recognition as idols. What is needed is a way for students to be renewed in mind and transformed at heart. Then there is the need to beware of "deceptive philosophies and traditions" in the college arena. One key warning is to avoid swallowing the pill of "education for upward mobility" at the expense of "education for responsible action." The subject of worldview is examined, and readers are encouraged not to buy into a "seeing is believing" mindset, but also to learn faith without seeing. Students ought to appreciate life as a story rather than some disconnected things. "Fish-eyed learning" needs to be put aside in favour of a Christian mind that is relationships aware, biblically based, and ideologically sound, instead of being sucked into ideological confusion. Opitz and Melleby string together the four part Biblical narrative (Creation-Fall-Redemption-Consummation) with the four I-s (Integration-Idolatry-Investment-Imagination) to help us connect the dots of learning. We are reminded that while learning is important, being changed from the inside out is equally (if not) more important. Some great advice are given, such as looking for a mentor; getting involved in care groups; volunteering in the community; engaging people of other faiths. Knowing includes a big part of listening. So What?=====Now in its second edition, this book is an important contribution

to Christians, particularly those involved in educational circles in some way. It can be teachers or students, parents or educators, leaders or community decision makers, and so on. The idea of "academic faithfulness" needs to be expanded beyond the circles of the academy. Without a proper worldview, students will be caught up in a world of varying ideas that can easily sweep them away. In this manner, it is like building a house on the sand of disconnected and disjointed philosophies rather than the rock of divine reality. Human philosophies and fabricated ideas will not stand up against the rock of the Creator, the Great Storyteller, the Sovereign Ruler of all. Though this book is aimed at a Christian audience, the general thrust of the book is to help us get a bigger picture of the purpose of education. I appreciate the way the authors describe the two erroneous expectations of most students: "beer and circus" and "grades and accolades." Education is not mere fun or fabulous grades. It needs faith. Lest we produce individuals who simply straddle through college to become aimless graduates, or a generation of people who can score perfect As but still flunk the school of life. Read this book. Buy it for your children or college students. For a student who is trained in "academic faithfulness" through college will stand a better chance of godliness and vocational integrity through the journey of life. Rating: 4.75 stars of 5. conrade This book is provided to me courtesy of Brazos Press and NetGalley in exchange for an honest review.
