## Synopsis

Joseph McMoneagle is an extraordinary remote viewer, a "psychic spy," whose experiences have given him a special insight into the nature of time and human perception. For more than seventeen years, he was a researcher and remote viewer for the top-secret Army project STARGATE. For years after that, he journeyed through time while working in a consciousness-development lab with out-of-body experience pioneer Robert A. Monroe. McMoneagle explores the questions that philosophers have for centuries debated: Does time really exist? Do our actions today really affect our future? Can we change the past? Do we slip between alternate realities? In *The Ultimate Time Machine*, McMoneagle delivers new insights into these mysteries, including: First-hand information-including transcripts from lab sessions-on the origins of humanity, the crucifixion of Jesus Christ, and the building of the Egyptian pyramids. Provocative suggestions about the nature of time, creation, and a constantly changing past. A detailed picture of our immediate future through the year 2075. More than 150 very explicit predictions on world population, aging, religious fragmentation, lifestyle changes, technological developments, and dozens of major changes to laws, customs and practices-all within a positive and constructive framework. A vision of the year 3000, comprising a test of what the author calls the "Verne Effect"-our ability to create and manipulate our future.

So I have read several books over the years since the turn of the century that have made an

attempt at prediction. All failed for me. But I have a lot of respect for this author after reading his Stargate Chronicles, which was a brutally honest recounting of his years in the Army as an intelligence officer and remote viewer. Still, reading this book was a struggle, especially the predictions, which are, at best, 20-30% accurate (generously speaking). Perhaps it's more difficult to predict the future (as opposed to focusing on a particular subject as they do on a typical RV session). The reason why I still gave the book 3 stars is because the author is, I believe, a person of integrity and someone who deserves a lot of credit for his contribution to this extremely important (yet nascent) science (RV), which I believe can unlock many mysteries of existence. But we still have to remain honest. All of us, writer/teacher and reader/student!

Really enjoyed this book. It is by one of the foremost remote viewers and a man of great integrity. I had the pleasure of meeting him after reading the book and am amazed by the depth of his knowledge and his experiences.

Decent book on a fascinating subject. Seems a little dated though and it would be interesting to have a revised version comparing and contrasting in his own words what he outlines in this book versus what has actually happened.

I read this book aug 20th 2015. It was mostly written in 1997. As I read the predictions for now, I watched them unfold in real time which was fun but not important. What is important is recognizing the true nature of reality which this book helps uncover.

Great informational book if you want to know what the government has been up to

This is my first Joseph McMoneagle book and I haven't ever been to the Monroe Institute. Overall I really enjoyed reading the book and the thoughts it stimulated in my mind. I can think of all kinds of questions I would like to ask the future such as when does artificial intelligence exceed human intelligence. About the last 2/3 of the book are actual predictions divided up by category. I am pretty sure that a bunch of the predictions were probably made in late 80's and 90's. Now that they are being published in 2013, maybe 5-10% predictions are for years that have already taken place. It is hard to put a number on his accuracy. If he gets the incident right but the year wrong, is that a "hit" or a "miss?" If the author can "predict" 50% of the future is that amazing or is that horrible? Is the glass half empty or half-full? On some subjects, you do see the author's military background show

through. It is a very different thought pattern than many authors on books in the occult/spirituality/paranormal categories. It is a refreshing change. Overall I find his idea of using this kind of paranormal technology to try and usher in the future faster a very compelling and powerful idea. I hope it is used to bring humanity more quickly into the future (so that I can drive a flying car.)

It was a very interesting book to read. The author takes you to places your thoughts have never gone. This is the type of book that is enlightening, something we all should aspire to.

Have not had a chance to read very much of it, but what I did , very happy with it.
