A.E. Bennett was an instructor in New Brunswick, Canada. Following a successful career as a high school drafting teacher, Louis J. Siy spent 20 years as an industry professional, serving as both a draftsman and a consultant. Siy remains active in the AWS and has served on the organization's Symbols Committee.

There are times on the exercises at the end of the chapters, some of the questions don't line up with what was in the chapter. The blueprints at the end of the book sometimes even confuse the instructor. The book is also supposed to come with a welder's wheel with most of the blueprint symbols on it. I had to order it by itself because it didn't come with the book when I ordered it. In my opinion, this book is not worth the \$90 I had to spend on it.

Can't be beat. Very detailed exploration of welding symbols. Another fine choice for Columbus Georgia's Columbus Technical College curriculum.

I needed this book for a class I am taking. This book has so many errors I stopped counting. There is an average of 3 errors per chapter. Luckily for me my instructor does not grade the work from the book and makes up his own tests. We are assigned work from the book and then go over it in class. This is how we realized all of the errors. We (as a class) only consult the answer key when it is absolutely necessary. Just keep this in mind as you go through the class associated with this book.

Fair price as used book!! No missing pages. Looks pretty used but it's okay. Just someone's little writing and highlighting. But super fast shipping within two days when I really needed it!! I would say a great seller with fair price for this fair condition. If you don't mind someone's writing and highlighting on book. Thank you for super speed shipping!!

This book is utter garbage. Don't waste your time and money, wait to take the class until they change books which they will do after one or two semesters of this crap.

This is a new book, so it had all the drawings and graph paper intact. I wish it had more examples and was more in depth. I'm not good at sketching and conceptualizing drawings.

I enjoyed reading this book. Well written book.

Delivered as promised. I paid half the price of what the school bookstore wanted.
