If your child is in the 8th grade and he/she is somewhat advance, I would not purchase. The lessons in this book are below my son's level. He was doing this kind of math in the 6th grade. I would purchase a grade or two higher.

Was exactly what I was looking for this year. Wanted to be able to go over some of the things we did last year and then be able to continue forward and with this workbook it is perfect! Thank you Spectrum!

Just what I needed for my soon to be eighth grader to get more help over the summer break to really understand her math!

As expected. Will help my son to master his 8-th grade math and develop independent, critical thinking.

Good if you know how to teach it!

Spectrum Curriculum is great! So glad to have found it!

Good for summer time!

This type of book can be a helpful source.
