Audiences are raving about "Mad Max: Fury Road". This is a great book that will serve as a nice companion to the film. This is a well-balanced book that includes a lot of imagery: early sketches, concept art, production photos, character portraits, and shots of the finished movie. The book is mainly organized by major characters and sequence. Material is presented in chronological order of

how it appears in the film. Anyone who has seen "Fury Road" knows that it has a very distinct look, whether it be the complex vehicles, the unique character makeup, or the overall color palette of the film. As you might imagine, there is a lot to explore in this art book, which allows you to see the design work up close and study it. There is also text in the book which highlights some of the design challenges as well as the overall film production process. Obviously, this book is highly recommended if you are a fan of the movie and were impressed with its visual elements. What's included in the book:- A look at all the characters in the film: including Max, Furiosa, and Immortan Joe- Makeup and costumes- Designing the Citadel- Creating the Vehicles (which were built to look great but also withstand the stunt work required)- Storyboards and sketches of key sequences- On-location photography (including shooting in the deserts of Namibia, Africa)- Photographs of the props, weapons, and vehicle interiors[Note: See comments section for links to a Photo Gallery of the book & the HD unboxing video]

I've received a few request for the review of this artbook and now it's finally here. The Art of Mad Max: Fury Road is a huge 176-page hardcover artbook that measures 16 inches diagonally across. This book features the art and making of the film. In terms of break down, I would say it's 50-50 art and photography. The art consists of storyboards, story scene paintings, character and vehicle design. The photography are of film stills, behind the scenes shots and those to highlight certain aspect, such as close ups on the different vehicles. The photos are fantastic also because they are really high res where you can see lots of details and well composed like film art. The artworks are beautiful with a nice textural feel to them. I'm not sure how they are created but majority is definitely not digital painting, more like pencils, pastels, and those grainy medium, and some paintings also. Some drawings actually reminded me of Moebius' art because of the level of detail rendered. So what's featured exactly? Furiosa and the wives, Immortan Joe, Coma the Doof Warrior, Miss Giddy, Nux and the many other characters. Vehicles are the highlight also and we have the War Rig, Gigahorse, Big Foot and various other pursuit vehicles. The vehicle designs are really amazing. Overall, there's this really gritty steampunk look to everything and everything seems to work well together visually. The commentary included talks about the filming process, the characters, story plot at time, vehicles, building stuff, the staging and even some nostalgia from the first few Mad Max films. It's an insightful read. This is a seriously good art book. Highly recommended. (See more pictures of the book on my blog. Just visit my profile for the link.)

An in-depth look at creating "Mad Max: Fury Road", from the initial planning stages, right up to

production. Plenty of detailed illustrations and on-set photos, directors' and actors' commentary, and insights on plot and production from the producers. Great for fans of the movie, who want a closer look at production techniques and how the movie was made -- but might be a bit lacking for those who are looking for more insight on the world of Mad Max, and backstory of the characters. I guess there will be material released separately to expand on that. A great companion to the movie. Will require readers to have actually watched "Fury Road" prior to reading this book, as there are story spoilers abound.
