Let's Meet A Dentist (Cloverleaf Books - Community Helpers)

Synopsis

Have you ever had a toothache? Or gotten your teeth cleaned? Dr. Florez could help you out! She's a dentist, and today she has an office full of curious visitors. They try out her dentist's chair and look at X-rays of teeth. They also learn how she helps patients keep their teeth clean and healthy.

Hooray for dentists!

Customer Reviews

Bridget Heos is the author of more than a dozen young adult nonfiction books as well as the Expecting Animal Babies picture books. Bridget lives in Kansas City with her husband and three sons. Kyle Poling is an artist specializing in illustration, graphic design, books and greeting cards for children and young adults.

I love that the dentist is female! It does describe correctly what happens when you go visit a dentist.

The entire "Let's Meet a..." series from Cloverleaf Books is excellent. I teach in a Pre-K class and I love these books for our Community Helper theme. They provide information about what the worker does without being overwhelming. They are short enough to hold the children's interest, but have

enough content to make them worthwhile. Also, and most importantly, the children like them!

thought it would be a good book prior to first dentist visit

good book for nighttime reading with my daughter

Dr. Florez came out to meet the class who was clustered in her waiting room. They were all excited to learn about what a dentist does. When she told them she saw "about twenty patients every day," they were very surprised. If you counted up all the teeth she saw, that was "more than four hundred teeth!" They all crowded into Dr. Florez's exam room and she began to tell them about what went on in there. Jasmine sat in the chair and they all waited for Dr. Florez to begin after she put on "gloves and a mask." After Jacob asked a question she started to talk about Pam, her dental hygienist. After Pam scraped "gunk off with special tools," she would polish their teeth. Dr. Florez showed them how the machine that polished them worked. Open up wide because after those teeth were polished it was time for Dr. Florez to take a look with her "tiny mirror and something she [called] an explorer." She was checking for cavities and then showed the class a set of x-rays. They also learned about bacteria, the need to brush and floss each day, what to do to "keep your teeth happy," fillings, toothaches, how she keeps track of patient's teeth, and told them many other interesting things about what dentists do. This is a fun look at Dr. Florez, a dentist, who teaches a class all about what she does. Elementary school children often go on field trips to visit professionals and learn what their jobs entail. This is a beginning chapter book that will enable young students to be prepared to ask important questions when they go to visit a dentist. There are numerous informative sidebars that add additional information to the text. This is one in a series, "Community Helpers," that will enable children to explore and learn about people who work in their communities. The newly independent reader can work through this book with a bit of assistance. In the back of the book is an index, a glossary, an activity (Make an Apple Mouth Snack), and additional book and website resources to explore.
