Undergraduate Writing In Psychology: Learning To Tell The Scientific Story

Synopsis

Now updated to reflect the changes made from the 5th to the 6th edition of the Publication Manual, this book takes the reader step-by-step through: * crafting research questions or theses * executing library database searches * analyzing, evaluating, and synthesizing literature * drafting specific parts of a paper * and more Writing samples, including two full-length student papers in draft, marked-up, and final form, illustrate key concepts such as how to synthesize literature, how revision differs from editing, and how to recognize and avoid plagiarism. Guidance on how to communicate with instructors on a professional level is given, and the book shows examples of checklists and grading rubrics instructors might use. A self-quiz to engage the reader's knowledge of APA style and format is also included, as well as example reference formats and other quick-reference style tools.

Customer Reviews

R. Eric Landrum, PhD, is a professor of psychology at Boise State University. He received his doctorate in cognitive psychology from Southern Illinois University at Carbondale. His research interests centre on the educational conditions that best facilitate student success (broadly defined). He has given over 280 professional presentations at conferences and has published 17 books or book chapters and over 70 professional articles in scholarly, peer-reviewed journals. He has worked with over 275 undergraduate research assistants and taught over 12,500 students in 20 years at Boise State. During the summer of 2008, he led a working group at the National Conference for Undergraduate Education in Psychology, studying the desired results of an undergraduate psychology education. Eric is the lead author of *The Psychology Major: Career Options and*

Strategies for Success (4th ed., 2009) and also authored Undergraduate Writing in Psychology: Learning to Tell the Scientific Story (2008) and Finding a Job With a Psychology Bachelor's Degree: Expert Advice for Launching Your Career (2009). He is a coauthor of The Easy Guide to APA Style (2012). He is a member of APA, Fellow of APA Division 2, and currently serves as Division 2 secretary. He teaches general psychology, statistical methods, research methods, psychological measurement, and a Capstone course in history and systems in psychology.

Love it.

I just completed my first year in an experimental psychology program, and because of that, I do a lot of writing. I have only recently finished reading this book, but it was of great value and wish I had read it a few years ago when I was an undergraduate student and decided to pursue a graduate degree. I do not mean to say that only undergraduate students can benefit from it; I have benefitted from it a great deal, in fact. This is a book for anyone in psychology: the student looking for an edge in writing his or her papers, the one who just wants to get some tips to make the process easier, the student who dreads writing and procrastinates until the last minute, or the writer who loves to write and just wants to become a little more savvy. Simply put, this book is for you if you are reading this and contemplating buying it. **Just buy it already.**

Would recommend getting the book

Very pleased with the product and the short amount of time it took for me to receive it.

Just as described

What I expected

A big assist in research paper writing at University level... Or providing a base standard for your personal writing

great lessons
