Russian Aviation Colours 1909-1922. Volume 2: Great War (Camouflage And Marking)

Synopsis

Books describe the history of the little-known emblems and distinctive markings of Russian military aviation from its early origins up to the Russian exit from World War One. The authors have managed to collect, and in some cases partially reconstruct, the majority of emblems and signs used in Russia during this period by military aviation units. The collected material is presented in a clear and attractive form - color plates, reconstructed logos, and original photographs from public and private archives. This profusely illustrated book covers all the aircraft used, with brief details of their service use and comprehensive details of the colors and markings they carried. Besides the many photographs, full color profiles illustrate the markings applied. Detailed color notes and precise descriptions and illustration of national markings over the period complete a book that will be invaluable to aircraft enthusiasts, historians and modelers.

Customer Reviews

“Inside archival photos, aircraft illustrated reproductions, insignia, logos and color plates and maps are accompanied by detailed examinations of key battles and conflicts that make history come alive from this little known segment of WWI. (Boyce McClain Collector’s Corner)” “Dozens of beautiful color plates & profiles, plan views and insets & tincture text. Dozens more rare, previously unpublished aircraft photos & many from private collections & augment artwork. And all come backed by

brilliantly researched, thoroughly annotated manuscript. Text comes packed with fascinating facts. The segue on international talismans and mascots, for instance, proved surprisingly spellbinding. Robustly recommended! (CyberModeler)"In all, we have what every enthusiast wants in a book. It is well written, superbly researched, has lots of great photos and includes a bevy of superb color profiles based on the photos in the book. It is one that I am sure you will find just as fascinating to read as did I and is most highly recommended." (ModelingMadness)

The second of the four volume series; this volume covers Russian aircraft during the Great War, with a smattering of bombers and trainers. Some of the photographs are stunning, and I haven't seen many before. The color profiles are also very nicely done. This book is rather steep in price, but is worth having for those interested in First World War Russian Aviation. Combined with previous books on the Imperial Russian Air Service, it makes a worthwhile addition to the libraries of aircraft modelers and aviation enthusiasts alike.

Truly an excellent book with many rare photographs and lots of very good color profiles. If you have any interest in the IRAS then this book is a 'must'.

Exceptional book, beautifully illustrated, excellent research, high quality hard cover. Can't wait for volumes 3 & 4!
