DISEASES as well as a co-author on DELMAR'S VETERINARY TECHNICIAN DICTIONARY. She received her Bachelor of Science degree in animal science from the University of Wisconsin-River Falls and her Doctor of Veterinary Medicine and Master of Science degrees from the University of Wisconsin-Madison. She remains active in veterinary practice through her relief practice, where she works in both small- and mixed-animal practices.

I bought this for a college zoonotics course. It was well-written and easy to understand. I recommend it to anyone looking to learn more about zoonotic diseases.

Great condition, purchased for school.

My only issue with this textbook is the end-of-chapter questions and case studies. I like to use this to check my knowledge; however, there are no answers either in the textbook or available online to check your personal answers against.

This was a required book for one of my classes. I like the technical nature of the book and the organization of the material.
