It was what i expected and fulfilled the required book for a course i was taking. Speedy delivery and no issues receiving on time.

Good condition

I do not like this book....it jumps and skips from chapter to chapter. Boring.....and I LOVE accounting.

The book was advertised as being shipped with CD, but it came without CD. When I told the seller, that I need CD. He never responded back.

This is a horrible book! Do not buy it. It is a student's nightmare. If you want to learn about government and nonprofit accounting, you're NOT going to gain much, if any, knowledge from this

book. The authors do not use plain language, but talk back on themselves in sentences so that the flow of thought is interrupted and you must eliminate words in order to continue the flow, or switch thoughts entirely and then switch back-many times the subject of the sentence is completely lost and never finished. Many unnecessary comments, such as "need not be discussed here" and "as one would expect" plus excessive references to other chapters and Illustrations that are useless. Very limited on examples; I found it necessary to search the internet for the answers to the questions at the end of the chapters because the questions are not worded in relation to the information stated in the chapter, and the problems utilized account names never discussed in the book.If you have a strong foundation in government or nonprofit accounting, then this book might be useful as a reference. For a student just learning about the systems, it is pretty worthless.Professors, I beg that you use the feedback from students to develop a book from which we can actually learn these procedures. I never looked forward to an accounting class more than this one, and I'm so disappointed and feel like I've wasted my money. I know that the professors have the knowledge to teach the information in a way that we understand, so just put that into hardcopy and produce a proper book for students!For an online class using this book, don't waste your time or money.

just fine, low price. my neighbor love it, nice, feel good. The good thing about this product is that I can now cut thin slices of my homemade fresh bread!

This book has got to be one of the worst textbooks I have ever had the displeasure of being forced to purchase. Given the common subject, it is generally easier to find detailed information about government and non profit accounting instructions on the internet than it is to find a clear answer in this book. Some of the guidance is so poor regarding the feedback from the test bank questions that my class often jokes about how the PA who wrote it must have been struggling with the subject as well.
