Look ma, no textbooks! The Learn in Your Car series treats you like a child--in the best possible way--starting with one-word phrases ("please," "good-by"), counting exercises, and simple nouns ("bus," "train") designed to imitate a child's learning process. First you hear the words in English, then they are repeated slowly in clear, unaccented pronunciations. The method is extremely effective for those who don't know a thing, or for those who want to brush up by testing themselves when the English words are spoken. The tapes emphasize the building blocks of communicating in a foreign country rather than rote phrases that only apply on the tape and not in real-life exchanges. Level 1 painlessly covers basic verb forms, essential prepositions, near future and past tenses, as well as shopping, hotel reservations, and other travel-related situations. The series includes French, German, Italian, Russian, Japanese, and Spanish in three levels that can be purchased individually or in boxed sets. Each level contains two 90-minute cassettes (or CDs) and an accompanying booklet (not for use behind the wheel) with helpful explanations and scripts for the lessons. --This text refers to an out of print or unavailable edition of this title.

There are people who are quick at learning new languages. There are people who take their time,

and need constant repetition to understand and remember grammar and vocabulary lessons. If you are on the first group, this product is for you: you'll go fast, figure things out along the way, and by the time you are finishing for a second time all level 1 (a total of three levels), you'll feel ready for a good trip to Italy. If you are on the second group, choose a different product, like the Pimsleur CD package, where they go little by little, making sure you understand and got everything right. I got the Pimsleur and got bored after 5 minutes. I got this product instead, and while I am sure I will a few mistakes here and there, it gave me the confidence that I needed for my trip.

I am a true beginner, and when I started listening to this course I liked it. It is structured for simple vocabulary building (words/phrases in English followed by Italian translation). But even to me it was clear that Italian speaker in not native. As I listened to other audio classes, I questioned pronunciation, and confirmed with my Italian teacher, that a lot of words on this CD are mispronounced(the rest of reivews seem to agree), and some are presented in wrong content. Unless you are ready to double-check every word you learn, stay away from this course.

It's a good way to use your time in the car, but I fill that one should be ready to spend time with it at home & follow the book that this set is comming with. Once you are easy with it you may continue your study in the car. That that my wife & I are doing & we already know more then one.

I have used these series for several different languages and they have always been extremely practical and versatile, enabling me to perform many basic language functions! I wish they were still in production.

I'm slow catching it but thats my pace

I like listening to these on long car trips. This is somewhat helpful though a lot of the phrases are not practical. I wish there were more phases I could use in my everyday life at home so I could practice with my family.

This is a great way to learn basic italian for travel while doing your daily commute. I loved it.

While I wouldn't play this in my car (too distracting), it is a wonderful series to help review the language. It covers all that you need to travel in Italy. I was able to have conversations with my

family who live near Naples.
