Emily Henderson is a stylist, interior designer, TV host, and Editor in Chief of the daily website Style Emily Henderson, which Apartment Therapy named the Best Home Design & Inspiration Blog of 2014. Her work has been featured in InStyle, House Beautiful, and domino. She lives in Los Angeles with her husband, son, and daughter.

I follow Emily's blog and could not wait to buy this book. However, after reading it cover to cover, I was mildly disappointed. She has a quiz for what style you are, and then proceeds to have almost all photographs (however gorgeous) mostly in the mid century modern, or boho style. There isn't much of any of the others. If she is so talented, why can't she feature a cabin in the woods styled up, or a cottage home, or traditional house? Isn't there anything else to decorate with besides books, leather mid century chairs, fig leaf plants, and naked human art?

This helped me a lot when I wanted to redecorate my house. It contains a lot of ideas, some are pretty nice and some are a bit off. There is a variety of color combinations to choose from and kinds of theme you would probably want for your room. The style quiz though, doesn't seem to be helpful

at all. It's an okay book for starters.

Wonderful book! I can't get enough of it. It has introduction to styles for beginners like me. No obscure names and unknown words, she explains everything. It also helps you determine your style. Plenty of inspiring photos of interiors with explanations of how it was done. I feel I have a sense of style with it :)

I really enjoy this book and check it out often, but found that much of the same material is available on the author's blog meaning that I could have saved the money.

I was really excited to get this book. Both my parents are designers, decorators and former architects, so I feel like I own about 1,000 home decor books and I am always excited to add more to the collection. I read some of tips online that are directly from this book and thought they were lovely, which is why I bought the book. It seems that the best this book has to offer was already posted online because the few bits I found were the only bits that were useful in the entire book. The advice she gives claims to be useful for a number of different personal styles, but they were all just iterations of just one style: some kind of cross between bohemian, and ranch "chic." Every style guide in this book was cluttered and strange and frankly exhausting to look at, especially when you consider that these are for your home, your comfortable every day space. She forgets that while some things *might* look cool at a glance, nobody will want to come home every single day to 16 framed drawings of eggplants above their couch on a brown wall. Or to three paintings of naked ladies in their "artist space." Or to a kitchen decorated entirely with gold and mirrors. Or to a dark scary forrest painted from floor to ceiling in their bedroom. I personally have what she describes as a "traditional" style (as defined by the style guide/quiz in the book), but there really was nothing resembling traditional in the book, even by her own definition of traditional. This book overrated and frankly ridiculous. I'm not sure I've ever returned a style book in my life, so this is a first. [SPOILER] She only says two useful things in the book: 1) Find pictures of home decor that speak to you, and emulate them (which is fantastic and classic home decor advice) and 2) hang curtain rods higher, longer and wider than the windows so that they don't block light and look more polished (another gem for any style). Both those tidbits I found online and nothing else in the book came close to useful. I recommend instead *Domino: The Book of Decorating: A Room-by-Room Guide to Creating a Home That Makes You Happy*. The advice in that book is timeless and practical. I've owned this book for years, it is by no means dated and the room by room style guides continue to

provide advice that keeps my personal space fresh and beautiful. I especially LOVE the "small space solution" section in every chapter that gives advice for smaller spaces. Despite the dozens of home decor books that I own, I find that I use the Domino book more than any of the others. Go for that instead!

I had high hopes in this book and overall it does have good information. The style diagnostic quiz is pretty flawed (my mom answered all A's and F's which the quiz averaged out to give her a style that wasn't even close to hers). Of course we can go back and see that she was really half mid century and half traditional, but just thought I'd point that out. And it was fun learning what style(s) I am, but pretty much didn't see any inspiration or information on my style once the quiz part was over, which was a bummer. It seemed as though many of the "tips and tricks" were written for those only styling to get a good photo (placing jeans at the end of the bed, placing a bike outside next to the house) which are great if all you want is a photo, but not useful for everyday living. Overall I did like the book, I think I just may have had too high of expectations. I wanted the sections to be longer, I wanted more words and less pictures. Still happy I bought it and still think it will be a good resource to use now and in the future, just wasn't quite what I was hoping for.

I am an Interior Designer and have many many many design books and love them all (mostly). This book is the missing piece that I didn't know I needed. Anyone interested in design, and even if you are a designer, will find this book incredibly thoughtful, interesting and helpful. Thank you Emily for sharing your "secrets".

I am a huge EH fan. I pre-ordered the book. The photos are beautifully styled and expertly shot. Kudos! The content is charming and useful. However, I was totally distracted by issues with the typography and overall graphic design. I only mention it hoping those producing books up their standards for this very vital part of publishing.
