Polyurethane And Related Foams: Chemistry And Technology

Synopsis

Polyurethane and Related Foams: Chemistry and Technology is an in-depth examination of the current preparation, processing, and applications of polyurethanes (PURs) and other polymer foams. Drawing attention to novel raw materials, alternative blowing agents, and new processing methods, the book accentuates recent innovations that meet increasingly stringent environmental and fire safety regulations as well as higher quality products. Written by Dr. Kaneyoshi Ashida, a renowned pioneer of polyisocyanurate (PIR) foams, the book details the fundamental chemistry and material properties for each category of foams. The author presents mechanisms for chemical modification and foaming reactions, emphasizing the relationship between molecular design and enhanced physical properties. The latter half of the book focuses on polyurethane foams, the largest segment of the polyisocyanate-based foam industry. It contains a fully updated description of the chemistry, raw materials, manufacturing, formulations, analyses, and testing involved in producing a wide variety of progressive applications, including building materials. This book chronicles the scientific and technological evolution of preparation and processing methods for polyisocyanate-based foams. Polyurethane and Related Foams: Chemistry and Technology offers a clear and concise guide to the technologies, methods, and best practices that help the foam industry meet higher quality, health, and environmental standards.

Book Information

Hardcover: 154 pages

Publisher: CRC Press; 1 edition (September 22, 2006)

Language: English

ISBN-10: 1587161591

ISBN-13: 978-1587161599

Product Dimensions: 6.5 x 0.6 x 9.3 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 1.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #1,038,092 in Books (See Top 100 in Books) #69 in [Books > Engineering & Transportation > Engineering > Chemical > Plastics](#) #271 in [Books > Engineering & Transportation > Engineering > Materials & Material Science > Polymers & Textiles](#) #366 in [Books > Science & Math > Chemistry > Industrial & Technical](#)

Customer Reviews

I had problem when the book arrived in my country. UPS has not informed me that book is in the

customs. For this I had to pay for keeping the book in shelves of the custom (20 \$) and additional 15 \$ custom. I had to go 60 km to pick up the book. So they did not deliver to my address. Please inform me can you in the future send the books with DHL. Regards

This book was not formatted properly, judging by the poor content and coverage of PUR foams. It appears to be written by someone that barely knows their chemistry. The book is absent of useful information; it is also overpriced for content. This was a book written by a scam artist.
