Customer Reviews

Daughter has Algebra this semester and it is very well constructed. I know she will get a lot of use from it.

I ordered this for my up coming semester and by looks of it the explications are good & easy to understand. I will be purchasing more from this company for my niece that's going to be learning 7th grade math. I will purchase the rest of the algebra ones as well. Also I accidentally ordered an extra one and the company has no issues giving me a refund.

I own several of the Quick Study Guides. They are durable and great for a quick reference or review. Since they are plastic coated and punched for a three ring binder so they are very easy to use and store.

Love it

My 14 year old, who hates Math with a purple passion, actually thanked me for buying the study guide for her and said it has helped her. Be still my beating heart !

This is very helpful especially if you are suffering poorly with Algebra.

I have a 14yr old that I home school and he is having trouble with Math. These charts are very detailed and self explanatory and I would encourage anyone struggling in Math to try these out. They really do help. The cost is very low and they deliver very very quickly!

Use these all the time!
