Making Chair Seats From Cane, Rush And Other Natural Materials

Synopsis

An attractive chair seat, skillfully woven by hand from natural fibers, can do more than merely enhance interior décor. It can also be a source of pride for its creator. Now, with this guidebook written by one of the field's best-known experts — a distinguished faculty member of the New York State College of Human Ecology — do-it-yourselfers can master the fine art of weaving and fabricating chair seats. Professor Comstock's easy-to-read book, abundantly illustrated with more than 160 step-by-step photographs and drawings, tells how to make seats from a variety of natural materials. Included are intricate patterns woven from cane; sturdy and attractive seats made from twisted strands of rush, rope, Hong Kong grass, and twine; a basket-weave effect created from splints (thin strips of wood); and more. All aspects of the subject are considered — from selecting materials (including how to gather and dry such fibers as rush) to preparing the chair, equipment needed for various weaving processes, how to warp and weave, and ultimately, how to finish the seat. Craftworkers looking for a new medium of expression will find this manual an inspirational guide to learning a distinctive craft. Others will want to acquire these skills for their practicality, considering the high costs of professional caning and related techniques.

Book Information

Paperback: 48 pages

Publisher: Dover Publications; 2nd edition (November 1, 1988)

Language: English

ISBN-10: 0486256936

ISBN-13: 978-0486256931

Product Dimensions: 8.2 x 0.2 x 10.9 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 36 customer reviews

Best Sellers Rank: #411,258 in Books (See Top 100 in Books) #69 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > Furniture](#) #104 in [Books > Crafts, Hobbies & Home > Crafts & Hobbies > Nature Crafts](#) #320 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Home Repair](#)

Others will want to acquire these skills for their practicality, considering the high costs of professional caning and related techniques.

same reason as stated above

Like this book. Can't wait to try these out.

I ordered these books from my wife and once I see the prices I opted to order both books for her instead of the lesser one she had requested me to order. She was surprised to have gotten both books and very gratefully surprised to open and see two books. After a night or so when asked if they covered what she was doing, her response was that and a lot more. Thank you very much for offering them at the really good price

No book is ever the complete info on any subject it would seem..... just cannot do it. But this one has some great ideas and enough graphics to help one figure it out the Old Fashion Way of doing things. I bought 2 more to go along with this one and between the 3 of them, I think I can or could now do any of it much better as a result.

Getting ready to work from this book soon. Instructions seem to be very easy to follow. I will find out soon.

Learning! It's hard to do but this book surely helps me understand how to accomplish this project I've started!

This is the first rush weaving book I've read which has actually given the process for natural rush work, as well as how to use fiber rush. We will be using this as an adjunct to a video on rush weaving we have also bought to rerush our dining room chairs. I also appreciated the other seat-weaving techniques presented. This is a fairly straightforward book which gives out good process information.

And now ate chairs are done!
