# Being In The Shadow: Stories Of The First-Time Total Eclipse Experience

## Synopsis

A total solar eclipse is considered to be a once-in-a-lifetime experience. But why would an astronomical event be of interest to you? *Being in the Shadow* describes what it is like to experience one of nature's most spectacular events, using personal stories from people just like you. By being in the right place at the right time, these individuals shuddered with fear and anticipation as the light dimmed, the temperature dropped, and their world plunged into an eerie darkness. They gazed in awe at the eclipsed Sun, feeling a sense of connection and unexpectedly gaining new life insights. After reading these personal stories, you will understand why you must get into the path of totality to experience a total eclipse. But be warned—once may not be enough.

## Book Information

File Size: 360 KB

Print Length: 131 pages

## Customer Reviews

I enjoyed reading this book before we went to Madras in Aug 2017 for the total eclipse.

This might be the most important eclipse book ever published. Rather than focusing on the astrophysics alone, it underscores how and why seeing one is not just for bearded geeks but

something that can be enjoyed by all. This gets underscored by well narrated actual accounts of unsuspecting people who found themselves captivated by the total solar eclipse that happened over northern Australia in 2012. These stories alone make this a fascinating read, but also the excellent metaphor between a solar eclipse and a chocolate lava cake is simply excellent. This book is the perfect gift for anyone interested in solar eclipses, and even more for who is not. It makes crystal clear what the fuss is all about - and helps realize that it might be good to smell the aroma of a chocolate lava cake or take a nibble of it's outer crust, it is always better to devour the whole thing. Anyone should see at least one total solar eclipse in their lifetime.
