Synopsis

Her world, her life, her future with the only person who remains true—the Agency stole everything. Now, Talia will sacrifice the little she has left to reclaim what's hers. When Talia runs away from the only life she's ever known, she can't fathom the lengths to which the Agency will go to get her back. But if the Agency Director— the man who raised her, trained her, and made Talia who she is— can't have her, he wants her eliminated. Suddenly, those she once considered friends are bona fide enemies, ruthless in their pursuit of her. Talia sets off on her most personal mission yet: rescuing the love of her life from those who hold him captive. But she never imagines that going after him will plunge the nation into chaos. Through it all, Talia no longer has control over the only thing that has never failed her. Her Talents are growing stronger by the day, and she's already losing control. Defeating the Agency will save countless lives, but triumph over the manufactured power within her will preserve her sanity....

Goodness! Such an amazing journey! Our characters have been through so much, TOXIC is going

to pay for all the wrongs they have done. War is on the horizon, TOXIC and the United agency against each other. The United has given Mac a deadline to surrender, but we know that is out of the question. With Mac's army of the created he is definitely a force to be reckoned with. But so is Talia, Eric and the rest of the coalition! Absolutely amazing series! I'm so amazed at the development and storylines.

It's been a while since I've actually read. Actually a friend turned me to reading again. She kind of pretty, confident like the cover suggests. Once I began, the story became interesting. Some parts reminded me of a movie. However, the story line worked because of her character. Invincible, good / bad girl thing, but still a woman to the end. Her boyfriend and other characters made the story progress. I credit the writer for making the story move. It's a good read all the way to the end. It doesn't end like the predictability would suggest. No give away's. (smile). I'll continue with next series...

I am not going to spoil anything. Trust me to just say, Wow, I am over 60 and really loved this book and all the books in the series. I actually found this story line and all the books in this series that built it better than Divergent! Highly recommend reading all books in order. Talented, Caged, Hunted and Created. I did not read the shorter books in the series yet, Exiled and one other. I will but these listed were the main parts of the story and picked up where the other left off. Highly recommend, if you like a good romance, action, adventure with a little sci-fi abilities thrown in.

OMG! I loved this book even more than the rest! Okay, maybe not more than book 1, but it was so FREAKING FANTASTIC!!! We are completely invested by the end of Chapter 1 - finding out a dear friend was involved in the death of her parents, knowing at the end of the countdown she'll be on her way to rescue Erik. This book was full of action, suspense, love, and lots of super talents! It was definitely a nail biter! Every time they would lose track of a friend I thought the worst was going to happen. Part of it broke my heart. I was amazed at the detail and how descriptive the author could be, I could visualize the entire book in my head! I loved the progression of the talents, even though the very idea of someone with that much power is a bit terrifying. The way the book was left with several open ends leads me to believe there will be a Book 5... but even if the story ends just where it is, that would be okay :) I was given an ARC of this book by the author for review. There may have been a little begging involved. Maybe. Just a little.

I bought this on release day back in December and put it off all this time because I didn't really want it to end. Turns out that was a mistake. Not only does it end in a cliffhanger that will continue Talia's story under a different series name but I couldn't remember what part some of the characters played in the previous books. The action in this is almost nonstop but I've seem to have lost the connection to the people that I had before. An important person is killed and it didn't really bother me, although to be fair I was never quite sure how I should feel for them. The war between the Coalition, UNITED, and TOXIC come to pass but with all the build up and action leading up to it I found the final showdown lacking and over too quickly/easily. As much as I loved Talia and Erik I'm stopping with this one.

I love these stories. The author does a great job weaving plot situations that keep the pages turning. I got the first book, Talented, free on BookBub. It was so good I bought the next one online and read it straight thru into the night. The books are similar to The Tairen Soul series by CL Wilson with certain characters able to morph and fly, and also remind me of The Hunger Games with the Talented being taken from their families and forced to undergo special combat training. But each of the stories have different focus as Talia begins to understand what has happened to her and what it means for her future. Each of the four books in the series so far was Excellent. I eagerly await the next book due out this year.

Okay, so, I was seriously looking forward to this book. Now that I read it, I have to say, I was a bit disappointed, it felt kind of rushed. And even though I understand why to recap certain things, to me they just took overhand. I also noticed some editing mistakes, which, drove me crazy. I didn't like that Donovan got killed by his father, that to me was taking it to another level. Now I don't want to make the whole book look bad, because it is not. I do enjoy the series, and I do enjoy knowing that there will be another book out next year. To me it's like with every series, when you have several books, then there are always at least one or two you don't connect with. In all the best selling book series I am reading, I have at least a book or two that are not to my liking. Okay, but enough of this. I don't regret to have bought this book, and I will also recommend to others. I am looking forward to the next book.

In book 4 the main character finally reaches her potential and is useful. Her trigger temper with wild mood swings are still there but with her finally having to put someone else first she has to control herself. A bit over the top in a couple places and was very disappointed with the decision to close

door what happened to Mac! This was the villain! The rest was satisfyingly creative and filled with action!
