About The Author: Marty Sternstein is a Professor of Mathematics at Ithaca College where he has taught since 1970, except for one year as Visiting Professor and Head of the Math Department at the University of the Virgin Islands, St. Croix, and two years as Fulbright Professor and Math Department Chair at the University of Liberia in West Africa. He has written textbooks in Calculus and Statistics, has been honored with numerous teaching awards, and has developed new curricula, including an ethno-mathematics class, "Math in Africa," and the first U.S. course for college credit in chess theory. Marty has strong interests in national educational and social issues concerning equal access to math education for all.

My daughter is a senior in high school. She has used this book throughout her AP course to and is glad she purchased this book.

This study guide worked well for my daughter who did well on her AP Stat exam.

This book focuses on solving problems on the AP Statistics exam. It does not provide much background in applications or basic concepts. For what it is, it is very good.

Nothing special other than an average prep book.

I am working now

good!

Good book. My son used it as supplemental reading along with his class material.

Very good book
