Genetic Roulette: The Documented Health Risks Of Genetically Engineered Foods

Synopsis

Eating genetically modified food is gambling with every bite. The biotech industry's claim that genetically modified (GM) foods are safe is shattered in this groundbreaking book. Sixty-five health risks of the foods that Americans eat every day are presented in easy-to-read two-page spreads. The left page is designed for the quick scanning reader; it includes bullets, illustrations, and quotes. The right side offers fully referenced text, describing both research studies and theoretical risks. The second half of Genetic Roulette shows how safety assessments on GM crops are not competent to identify the health problems presented in the first half. It also exposes how industry research is rigged to avoid finding problems. This book, prepared in with input by more than 30 scientists, is for anyone wanting to understand GM technology, to learn how to protect themselves, or to share their concerns with others. It is presented in the clear, accessible style that made Jeffrey Smith's Seeds of Deception the world's best-selling book on genetically engineered foods. As the world's most complete reference on the health risks of GM foods, Genetic Roulette is also ideal for schools and libraries.

Book Information

Hardcover: 312 pages

Publisher: Yes! Books; 4th edition (January 31, 2007)

Language: English

ISBN-10: 0972966528

ISBN-13: 978-0972966528

Product Dimensions: 8.8 x 1 x 11.3 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 73 customer reviews

Best Sellers Rank: #217,517 in Books (See Top 100 in Books) #10 in Books > Health, Fitness & Dieting > Nutrition > Genetically Engineered Food #132 in Books > Engineering & Transportation > Engineering > Bioengineering > Biotechnology #349 in Books > Medical Books > Basic Sciences > Genetics

Customer Reviews

"When I worked at Monsanto, I warned both scientists and executives that our GM foods may cause disease, but no one was even willing to listen, let alone investigate the unpredicted side effects. For them, it was all about profit. Now our whole population is threatened by the serious dangers described in Genetic Roulette."--Kirk J. Azevedo, DC
"Congratulations, Jeffrey Smith, for your

courage. Thanks to your tireless investigations, we need wonder no longer why corporations spreading GMOs are so secretive, why they've spent hundreds of millions to keep us from even knowing which foods contain GMOs. They don't want us to examine the shoddy science, the suppressed evidence, and, most of all, the real health risks that GMOs present. Read Genetic Roulette not only to protect yourself and your family but to learn through this breath-taking story what all Americans need to do to reclaim our democracy and protect our planet."-- Frances Moore Lappé, author of Democracy's Edge and Diet for a Small Planet

"I used to test for soy allergies all the time, but now that soy is genetically engineered, it is so dangerous that I tell people never to eat it--unless it says organic. Genetic Roulette tells you why you must avoid genetically engineered foods to stay healthy."--John H. Boyles, MD, ear, nose, and throat, and allergy specialist

Jeffrey Smith is the leading world expert in the understanding and communication of the health issues surrounding genetically modified foods. Genetic Roulette, which brings in original contributions by eminent scientists worldwide, makes it crystal clear that the American FDA should not be so cavalier about the potential dangers of these procedures."--Candace Pert, PhD, author of Molecules of Emotion and Everything You Need to Know to Feel Go(o)d and former Chief of the Section, National Institutes of Health

"The most comprehensive, well-documented, and highly readable exposé on the serious health dangers of GM foods."--Samuel S. Epstein, MD, professor emeritus of Environmental Medicine, University of Illinois at Chicago School of Public Health and chairman, Cancer Prevention Coalition

International bestselling author of Seeds of Deception and Genetic Roulette, Jeffrey M. Smith is a widely popular spokesperson on the documented health risks of genetically modified organisms (GMOs) and how biotech companies rig research, gag critics, hijack regulators, and spin fantastic unfulfilled promises. His Institute for Responsible Technology's Campaign for Healthier Eating in America is designed to achieve the tipping point of consumer rejection of GMOs to force them out of the food supply. The campaign encourages public and private showings of the Monsanto film and offers support material at www.ResponsibleTechnology.org. He lives in Fairfield, Iowa. You can visit Jeffrey's blog on the Huffington Post at <http://www.huffingtonpost.com/jeffrey-smith/>.

Excellent book! Everyone should have this and share with friends, family, and children. Our food supply is under attack and thus so is our health. It's critical that we educate ourselves and make wise choices for our food and health.

This is a book that everyone should read before the next trip to the grocery store. Much information is shared about the lack of safety testing and the cover-up of research. It should convince anyone that genetically engineered foods need to be seriously questioned. This book has been very helpful with the writing of my dissertation. Myra Saidlt

I did not realize this book had more than one copyright date and I seem to have gotten the older one. Lots of great information within, but it stops at the copyright date time. Seems to be more of an information book rather than a good read, however. Not exactly what I thought it would be, but great source for all the times GMO's have been challenged with the case outcomes.

Everyone needs to read this

Excellent, thank you

Great resource for scientific studies on effects of GMO.

good information

Everyone that eats food should read this
