## Customer Reviews

Oh, what a splendid read! I do so adore Norma's books. They never disappoint! I would like to thank the author for granting me an ARC copy of this book in exchange for an honest review. Trattora and her friends, otherwise known as The Four, are back in action and ready to kick some butt! I love the beginning of each Expulsion Project book. I enjoy reading the backstory of their parents and how Preeminence is taking control. In the Girl of Stone we start off where book one, the Girl of Fire left off. The Four are in a borrowed space ship on their way to Mhakerta, their birth planet, to save their parents and take down the crazy Artificial Intelligence system Preeminence which has taken over and enslaved the planet. Along their way to the planet they find all sorts of trouble between attacking space pirates, body poachers and terrifying predators. We have the sweet romance growing between our two main characters and I can't wait to see what happens to them in book three! Each character is growing and becoming more important in their roles; they work extremely well as a team. I also enjoyed the new characters that popped up and felt they played a role in the development of Trattora's overall character and decision making. She never leaves a soul behind. Near the last half of the book The Four finally make it to Mhakerta and infiltrate the core of Preeminence. What happens next is the battle to sabotage the artificial intelligence and bring the people back into power. The ending was so suspenseful! I can't wait to see what awaits these teens as they go back into space to save Trattora's clan and find out what happened with Ayma's father. Girl of Stone is an action packed, sci-fi, dystopian adventure, great for young adults and adults alike! It is a fast read and I would highly recommend this series to everyone I meet. Final Rating: 5 Stars

Picking up after the end of book 1, Trattora and her friends are heading towards their birth planet. Things don't go as easily as they plan, but these kids are so amazingly strong. Together they can face anything and overcome anything in their way. There was so much about this book that I enjoyed. Trattora, Velken, Ayma and Phin are known as The Four on Mhakerta and they plan to free not only their parents but the whole planet. I liked the twist at the end, and can't wait to read the next book!!

What happens when Skynet meets a people that seem part Firefly part Star Trek? The Expulsion project. What happens when people are viewed as only the sum of their (body) parts? The Expulsion Project. A highly enjoyable read that takes off immediately from where the first one ended. As such, I would STRONGLY recommend reading the first novel in the series prior to embarking on this one,

because concepts, groups, and people introduced in the first come back in a big way during the second. I believe it would still be highly enjoyable alone, but there are entire layers of nuance that wouldn't make sense without that background. Nonetheless, a masterful combination of suspense and sci-fi, with just a hint of romance thrown in. I read an ARC copy of this book, but that does not in any way affect my opinion. If I didn't enjoy it, I wouldn't have finished it and my review would have reflected that fact.

It is refreshing to find a science fiction writer who can spin a tale that I can't wait to read but hate to see end. All without the heroine constantly being in her lover's bed and someone cursing every few sentences. Norma makes me think of one of my favorite authors Andre Norton who could also keep me totally immersed in the story. I can't wait for the next book in the Expulsion Project series.

Please make it soon Norma!

Good but not as good as the first book which was much more original and organic. This one was kinda rehashed story in other books. However, it was still an entertaining read.

An exciting search by the four (read to find our meaning). An exciting story with strong characters and a storyline that you cannot put death.

This book was as well put together as the first book. It was an enjoyable read, would recommend it to everyone. Waiting for the 3rd book.

A fast paced story with a strong female hero, with a big heart. Science fiction at its best! Thank you Norma!
