Streetwise Munich Map - Laminated City Center Street Map Of Munich, Germany - Folding Pocket Size Travel Map With Metro Map Including S-Bahn & U-Bahn

Synopsis

Streetwise Munich Map - Laminated City Center Street Map of Munich, Germany - Folding pocket size travel map with integrated metro map including S-Bahn & U-Bahn lines & stations This map covers the following areas: Main Munich Map 1:14,000 Munich Area Map 1:73,000 Munich Metro Map Munich, regional capital of Bavaria in south central Germany, is the second most popular destination in Germany after Berlin. The city is a center for culture and arts, with a staggering assortment of museums. It is also a fun loving, convivial, good old fashion party town known for the annual Oktoberfest. Munich is a city of contrasts. The Marienplatz is the heart of Munich and the site of its most important historic buildings. The square is dominated by the Neo-gothic Town Hall featuring its famous Glockenspiel. The Alte Pinakothek houses one of Europe's most important art collections. In contrast is the Hofbrauhaus where beer has been swilled at this world famous tavern site since it became a royal brewery in 1605. In Englischer Garten you will find Haus der Kunst, a popular place for art exhibits. It is located adjacent to one of the best river surfing spots in Munich (there are several): the Eisenbach River. You can stand on the bridge and watch as surfers carve turns on the icy water. The water is shallow and the water is fast, so this may not be the best place to try the sport for the first time, but it is definitely worth watching as surfers line up for a chance to test their skills on this permanent 3 foot wave. And then there is Theresienwiese, the park on the west side of town where the vast beerhall tents are pitched for Oktoberfest. The main STREETWISE® map of Munich covers the central city in detail and contains all important sites, architecture, metro stations and parks. Also provided is an inset map which features Munich's metro system and fare structure. This Munich map will enable you to navigate your way to Nymphenburg Palace or Olympic Park, both of which are outside the center city. A Munich Area map, which guides you in, out, and around Munich, is helpful in finding the Munich International Airport and other out of town sites. Our pocket size map of Munich is laminated for durability and accordion folding for effortless use. The STREETWISE® Munich map is one of many detailed and easy-to-read city street maps designed and published by STREETWISE®. Buy your STREETWISE® Munich map today and you too can navigate Munich, Germany like a native. For a larger selection of our detailed travel maps simply type STREETWISE MAPS into the search bar.

Customer Reviews

'Don't leave home without STREETWISE.' --The New York Times'STREETWISE is an absolute travel essential.' --Travel + Leisure Magazine'In a strange city, your sense of direction is only as good as the map in your hands. The best maps to carry are published by STREETWISE.' --Chicago Daily Herald

STREETWISE® is the first map to be designed with modern graphics and is the originator of the laminated, accordion-fold map format. We've set the standard that every map company has imitated but never duplicated. Our mission is to make you feel comfortable, to make you feel safe in a place where you've never been before and to enable you to experience a familiar place more fully. The company was founded in 1984 by Michael Brown, who had been in international publishing for many years, setting up subsidiaries for textbook publishers. In the 1970s, Brown traveled extensively throughout Africa, India, the Middle East and Southeast Asia. Brown would take a large paper map, cut out the city center, folded it up and slip it into his pocket, thus preventing him from looking like a tourist in areas where discretion is the better part of travel. This was his tool for surviving. After many years on the road, Brown settled back in New York and decided to start his own business, based on the adaptations he had made to maps in his travels. His goal was to give someone the ability to navigate easily in unfamiliar terrain. He started with a new map format: the accordion fold. Such a simple idea, but at the time it was revolutionary. No more struggling to fold an awkward, oversized paper map. This new format would enable the user to blend in like a native, instead of stick out like a tourist. Brown then added lamination to ensure that the map would be a lasting tool. More important than the format was the design of the map itself. It had to be a map that not only succeeded above and beyond any map he had used, but was esthetically appealing as well. The look of it had to be as striking as the functionality. Color was introduced in a way that was

never seen before in a map - vivid purple for water, soothing gray for the background of street grids, gold to highlight elements of the map. Clarity, conciseness and convenience in a very stylish package. Building the business was a 24 hour job. Brown sold the maps during the day, zipping around Manhattan making deliveries on his Harley Davidson. At night he packed the orders and did the design work. More titles were added, each title requiring months of research and design. Today, STREETWISE[®] produces over 130 titles for major destinations, regions and countries throughout the United States, Canada, Mexico, Australia, Europe, the United Kingdom and Asia. We have grown from the back of a motorcycle to selling millions of maps around the world. Yet each title is still painstakingly researched and updated. STREETWISE[®] is one of the only, if not THE only map company that conducts research by walking or driving an area to ensure accuracy. After all, what good is the map if what you hold in your hands doesn't match what you see on the street sign? This lengthy fact checking results in superior accuracy; in effect, we've done the work, now you have the adventure. In the end, it's not about the map, it's about getting out and finding your own authentic experience wherever you go. It's about being in a city or a region and discovering things that you never thought you would find. You can do this if you have confidence and you have confidence if you have a great map. STREETWISE[®] is the great map that you need.

I own half a dozen Streetwise maps, and have always found them to be useful. We use our NYC one regularly, and then buy others as we take trips to different cities. This Munich map was used on a recent trip to Germany. The other cities we visited didn't have Streetwise maps available, so we made do with regular paper maps. But I prefer the Streetwise maps because they are laminated and fold up easy. It was rainy one day in Munich, and I didn't have to worry about ruining the map. We used the u-bahn and s-bahn to get around, but did a lot of walking. Our hotel was near the Bahnhof, but we spent days near the Marienplatz and the Olympic park. The Olympic park is on the reverse side of the map, but that wasn't a big deal. I was glad we bought the map for our visit this time. I had been in Munich about 5 years ago, with a different map, and this one was better. Recommended.

Streetwise maps are amazing. It's almost impossible to get lost in a city one has never been with these maps. This Munich map is no exception. I've yet to visit Munich but from my past travels using Streetwise maps in other cities, I always had my bearings in check. The thing that stands out about these maps are the dimensional landmark illustrations which helps tremendously because you know what to look for. I always knew where I was and what direction I had to go to get to where I wanted to get to. Thick, durable and compact - this map is made for travel. Well laid out is the Metro map as

well the index to find specific places of interest. But mostly you can find most of the attractions on the map itself because everything is clearly labeled. When I travel to a city I don't know I will always have a Streetwise map (if available) and a DK Travel book for specific and in-depth information you couldn't possibly see on a map. Both essential travel items you wouldn't want to be without if you want to maximize the exploration and enjoyment of your chosen destination.

Although this is a convenient map, and it was dated pretty recently, I found a lot of newer buildings not on the map or on there incorrectly. So for big picture or to find older buildings it is great, but use the local maps for U-bahn, S-bahn and modern buildings.

I bought 1 map for each of the 3 cities we were visiting on our trip. The first city, Prague, had a good metro map of their own and I only used the Streetwise map for clarification. When we went to Munich, it was pretty much the same thing. However, when we arrived in Vienna, we found their metro map very confusing and ended up using our Streetwise version almost exclusively. If you are going to be using local transportation and going to multiple cities, having a consistent map (with landmarks and hotels mapped out, by the way - very helpful) is incredibly helpful. :)

This map was ESSENTIAL to our trip to Munich. It was in our pocket the whole time and was exactly what we needed. It went as far to the edges as WE needed it to go, but I can easily see that it might not be enough for some people because it doesn't really cover all of the boundaries and outskirts of the city. We were in Munich for about five days, and there was some rain, and we heavily used this map.... but by the end of our Munich time, the edges laminating was coming apart. So this map isn't going to look brand new once you've finished with it, hence 4 stars and not 5. Also, we especially appreciated the S-bahn map as that was crucial for our trip!

We did use this map while in Munich and it was useful, but... I thought the map was too stiff and awkward to use. It was, shall we say, too laminated. While in Europe, we also used the MapEasy city maps, which I prefer because they could be folded and I could write on them if I needed to. Have a great trip, either way.

Best ever map for travelers....can't beat it for clarity and coverage of center city sights and streets. Laminated and pre-folded for durability and ease of access in day bags....don't leave home without one of these little maps to show you the way! Handy street and sight index makes locating points of

interest easy. Easy to read as well.

Very helpful and compact map! It includes a metro map, but we also found that printing out a light-rail map was helpful. We had absolutely no trouble navigating our way all around Munich with this and the light rail map together. It opens and folds very easily. It does have a tendency to pop open, so stick it in a guide book or pocket when you aren't using it and it is perfect.
