## Customer Reviews

Jack Jewers has written about Ireland for Frommer's since 2006. Born and raised in England, he loved listening to his great aunt's tales about life in Dublin during the civil war. Jack proposed to his Irish-American wife at a spa on the Ring of Kerry. Jack and his wife reside in Surrey, England.

We paired this book with Rick Steves' Best of Ireland and found that together they covered just about everything we needed. Frommers definitely covers more sights in more places while Steves is a bit more detailed and complete in their coverage. Lodging suggestions did not overlap much which was good since several smaller places had no availability. There was not much disagreement between them on the top locations but Frommers offers more "outliers" or hidden gems, some of which really appealed to us.

I just got back from a two-week honeymoon in Ireland, and this was super helpful! I found it too overwhelming to read before the trip, so I simply brought it along and as we were driving to our next location, I'd look at things that were in the area and recommended to see. We had a pretty flexible self-designed schedule, so our system worked really well. Between this book, Google recommendations, and Trip Advisor, we saw so many neat things. I'd definitely recommend this book, especially used as a supplement with other resources, to find things to see and do in Ireland. Just a note that many of the admission prices are incorrect- this is probably because things change fast and often, and it can be hard to keep up with. Not a problem for us, but just something to keep in mind. If you have a computer with you on the trip (or check prices beforehand), you'll be just fine. Usually they were only a couple Euro off. Enjoy your trip!!

Great book I gave as a gift for a friend that is going to Ireland. She loved it.

We just came back from the trip of a lifetime to Ireland and it wouldn't have been nearly as good without this book. Really, not only did it show us how to plan the trip, but the book came in incredibly handy when my phone died (long story) and I was able to rely on the suggestions and maps in the book to keep going. For those planning a trip: the book has terrific itineraries that are detailed enough that you can use them to craft an itinerary that's right for you (we ended up mixing and matching a bit). And the photos and historical info about the country got us really jazzed for the trip and helped us understand what we were seeing when we were there. We also were REALLY pleased with all the pub and restaurant recommendations. We were always the only Americans in these places (it was real insider advice) and they were all terrific (which is a big difference from what my cousin experienced when she traveled with a Rick Steve's guide---she ran into Americans everywhere she said, which was disappointing and why we didn't get that book, though I looked through her copy and liked the organization and photos of this book better). Get this one. It's the best

Seems very similar to 2016 but none of the places I want to visit have closed since last year so good to go

A great source of up-to-date information about Ireland. We used it to explore the northern half of the country and will use it again when we return to visit the southern half.

perfect for someone traveling to Ireland

well written
