Electricity (Science Readers: Content And Literacy)

Synopsis

Ever wonder what life would be like without electricity? Become electrified with the amazing facts about how electricity was discovered and how it has evolved over time. High-interest text and vibrant images and photographs fill the pages of this book to make learning about electricity fun and interesting. A “Think Like a Scientist” lab activity that supports STEM instruction is included at the end of the book for students to use what they learned in the text and apply that knowledge to the activity. A helpful glossary, table of contents, and index are also included for additional support.

About Shell Education
Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Book Information

Lexile Measure: 690 (What's this?)

Series: Science Readers: Content and Literacy

Paperback: 32 pages

Publisher: Teacher Created Materials; 1 edition (July 20, 2015)

Language: English

ISBN-10: 1480746819

ISBN-13: 978-1480746817

Product Dimensions: 7 x 0.2 x 9 inches

Shipping Weight: 1.6 ounces (View shipping rates and policies)

Age Range: 7 - 12 years

Grade Level: 4 - 6

Customer Reviews

Gr 3-5-The latest additions to this ongoing series deliver the same authoritative, comprehensive, and relevant information that educators have come to expect from the publisher. The high-interest subjects support inquiry-based learning and encourage readers to think critically about science, and they do so in an engaging way that holds students' attention. Photos, illustrations, and diagrams keep children motivated, while features such as "Think Like a Scientist" and "Your Turn!" encourage learning through hands-on activities. What makes this series stand out, though, are the fascinating facts ("grizzly bears can smell a dead animal up to 20 kilometers away!") and the fabulous photos, such as the close-up view of a butterfly's eye and rolled-up tongue. Smartly written, these innovative and imaginative volumes make learning fun. VERDICT First-rate nonfiction. (c) Copyright 2011. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc.
