# Research Methods In Physical Activity-7th Edition

## Synopsis

Research Methods in Physical Activity, Seventh Edition, systematically guides students through the research process, introducing methods and tools specifically for kinesiology and exercise science disciplines, including the subdisciplines of physical therapy, rehabilitation, and occupational therapy. The seventh edition leads students and novice researchers to research competency with the distinctive humor that has become a trademark of this internationally recognized text. This text provides step-by-step information for every aspect of the research process, from identifying and devising research questions to analyzing data and compiling results for presentation. Methods for qualitative, quantitative, and mixed-methods research approaches are addressed, and real-world research questions—including historical, experimental, epidemiological, and philosophical—are presented by scholarly contributors who give suggestions for approaches to follow. Photos, anecdotes, and humorous stories are used throughout the text to put students at ease and emphasize key points through practical applications. Enhancements to the seventh edition include the following:

- Updated information and techniques for electronic searches to ensure students use best research practices
- New information on meta-analysis and the benefits of journal-style writing that teach readers to evaluate and prepare data for scholarly journals and publication
- Special attention to ethical issues to help readers understand the regulations involved in using human and animal subjects
- New information on logistic regression that aids in the understanding of complex ideas
- Further explanation of qualitative and mixed-methods research approaches, in addition to quantitative approaches, to ensure readers use the most appropriate methodology for their research

The content of the seventh edition maintains and expands upon the logical content progression that has made Research Methods in Physical Activity the leading text in the field. Part I presents an overview of the research process, including problem development, preparation of the research plan, and understanding ethical issues in research and writing. Part II introduces statistical and measurement issues in research, and part III presents various types of or approaches to research and methodology from expert researchers in the field. Part IV includes a writing guide for result findings and details how to develop and organize research papers and presentations. Statistical tables and guides are available in the appendix. To aid instructors, Research Methods in Physical Activity, Seventh Edition, includes a suite of ancillary materials featuring an instructor guide, test package, an extra data set for instructors who wish to create specialized learning activities, and presentation package plus image bank. Research Methods in Physical Activity, Seventh Edition, instills in students the confidence to devise, collect, analyze, and present their research in a competent

manner by systematically guiding them through the research process. It is an essential text for all emerging researchers in physical activity.

## Book Information

Hardcover: 496 pages

Publisher: Human Kinetics; 7 edition (July 17, 2015)

Language: English

ISBN-10: 1450470440

ISBN-13: 978-1450470445

Product Dimensions: 11.3 x 8.9 x 1 inches

Shipping Weight: 3.2 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 12 customer reviews

Best Sellers Rank: #6,997 in Books (See Top 100 in Books) #6 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Sports Medicine](#) #7 in [Books > Medical Books > Medicine > Sports Medicine](#) #9 in [Books > Science & Math > Experiments, Instruments & Measurement > Methodology & Statistics](#)

## Customer Reviews

Jerry R. Thomas, EdD, is professor and dean of the College of Education at the University of North Texas. Besides writing the previous editions of this book, Thomas has authored more than 200 publications, 120 of which are refereed publications with numerous contributions in research methods. In 1999 he was named the C.H. McCloy Lecturer for his production of research throughout his career. Thomas has been editor in chief of *Research Quarterly for Exercise and Sport* and a reviewer for most major research journals in kinesiology and numerous journals in psychology. He has also served as president of the National Academy of Kinesiology, American Kinesiology Association, AAHPERD Research Consortium, and North American Society for Psychology of Sport and Physical Activity. In 1990 he was named an AAHPERD Alliance Scholar and in 2003 was named a NASPSPA Distinguished Scholar based on lifetime achievement in research. Thomas received an honorary doctorate of science from his undergraduate institution, Furman University, in the spring of 2015. Jack K. Nelson, EdD, is professor emeritus in the department of kinesiology at Louisiana State University. Nelson conducted and published research and taught research methods for 35 years. He has been an adviser on more than 50 doctoral dissertations and more than 50 master's theses. He has more than 80 publications and has served as editor of research publications. A fellow in the Research Consortium, he has been a member of AAHPERD, the

American Educational Research Association, and the American College of Sports Medicine. He has also served as president of the Association for Research, Administration, Professional Councils and Societies (now AAALF) and as vice president of AAHPERD. Stephen Silverman, EdD, has taught and written about research methods for more than 30 years. He is a professor of education at Teachers College at Columbia University and has conducted research on teaching in physical education focusing on how children learn motor skill and develop attitudes. He has published more than 75 research articles in addition to many books and book chapters. Silverman is a fellow and past president of the National Academy of Kinesiology and the American Alliance for Health, Physical Education, Recreation and Dance (AAHPERD) Research Consortium and a fellow of the American Educational Research Association (AERA). A former coeditor of the Journal of Teaching in Physical Education and editor in chief of the Research Quarterly for Exercise and Sport, Silverman was an AERA Physical Education scholar lecturer, a Research Consortium scholar lecturer, and Weiss lecturer and Alliance Scholar for AAHPERD.

I bought this book for an online course I am taking as part of my masters degree. It is a book that teaches you about how to perform research in various areas of physical education and exercise science. Most of these types of books are very boring and difficult to read. These authors use humor to help teach almost every concept. The only thing they can't make humorous is the equations. I would not recommend this book for recreational reading but is a good research method textbook. I used the two day shipping because I needed the book fast for an assignment and it came exactly when they said it would.

This book was helpful for the class I used it in. However, the authors seemed to make it into a joke so that took away from the content they were trying to convey.

To be honest, according to its complexity, this is one of the best book in the sport field I have ever red. It covers quite large amount of topics: from sport ethics to statistics.

Good book

Book arrived in perfect conditions.

It was the book I needed for a good price to rent

Necessary for a class, but had all the information I needed. Could have had more flair to make it more interesting to read.

Awesome
