Greg Green is the best selling author of The Cannabis Grow Bible and The Cannabis Breeder's Bible. He grew up in Ireland, and has travelled around the world learning about the cannabis plant. His formal education in advanced botany and plant horticulture has allowed him to become the foremost expert on cannabis horticulture and cannabis plant breeding techniques. His legions of readers are eagerly awaiting the new edition of his beloved book, The Cannabis Grow Bible.

I was understanding that there would also be recipes in this book. But overall it's great..lots of information..great pictures and will really educate you.

This book is organized with all the details your expecting it to provide. We loved the "how to" pages with illustrations. This book should be all you need for beginners who want to learn more. We absolutely recommend reading!

Good Grow Bible for the basics, not the how to tips, or the key ways to do it.... Has all the facts you need, not enough pictures, descriptions are ok but pictures there is just no mistakes.....

I was afraid it was going to be a "pot head" read but as the info is needed for our medical purposes, the book met my expectations perfectly. And it was received in a timely manner

absolutely the answer for anyone considering growing their own,or even if they want to understand what they are using better...wonderful source full of valuable information!

Decent entry point for anyone looking to learn the basics. That being said there is some outdated information. There are also far more spelling and grammatical errors than I would like to see or expect from a published reference.

Very informative. Loved the pictures that go along with the information!

Son loves the book
