Publisher: Kaplan Publishing; Crds edition (January 5, 2010)

Language: English

ISBN-10: 1607142538

ISBN-13: 978-1607142539

Product Dimensions: 6.3 x 4.3 x 3.4 inches

Shipping Weight: 2.6 pounds

Average Customer Review: 3.3 out of 5 stars 13 customer reviews

Best Sellers Rank: #942,459 in Books (See Top 100 in Books) #53 in [Books > Education & Teaching > Higher & Continuing Education > Law School Guides](#) #204 in [Books > Education & Teaching > Higher & Continuing Education > Test Preparation > Graduate School > LSAT](#) #262 in [Books > Education & Teaching > Higher & Continuing Education > Graduate School Guides](#)

Customer Reviews

This is a boxed-set of logic game cards made by Kaplan. Each card has a logic question on one side with the answer explained on the other. Deck is in near-perfect condition.

Super helpful if you have the motivation to use them

These flashcards are big and good. They teach each type of games from basics to more advance techniques, and is great as a review, additional practice or to solidify your foundation of games. Recommended.

Being someone that is always on the go, I thought that this product would be an excellent purchase to facilitate my studying for the LSAT. However, I quickly became frustrated with many of the cards. Going through them, I have found several wrong answers (i.e the answer says that letter B must be in position 1 or 2 but the explanation shows that the letters H, C, and G come before it. If three letters come before B, then the earliest position B can be in his four). The explanations offer no real insight. There may be a handful of cards using the same premise and conditions but asking different

questions. Each of the answer would be explained using the same exact explanation which offers little if one got the answer incorrect. Another problem I ran across was that questions would not be worded correctly and created confusion into what was being asked. One example was 7 people being placed into 3 vehicles. The question somewhat gives the number of people in vehicles 1 and 2 but does not ask for the number of people in vehicle 3 (despite what the answer and the cookie cutter explanation wanted) - it asked for the people in the "other vehicles." Finally, I have found these cards very simple - when answers are correct and the question was clear on what is being asked - to other LSAT study products that I have used in the past or currently using. Because of the ease compared to other LSAT products and the desire to do as well as possible (which is probably the goal of almost every single person taking the LSAT), this product would probably be best used if one is starting their LSAT studying, when on the go (I took them on vacation, when I went to school, waiting at appointments, etc.), or maybe as a mental warmup the night before and day of the actual test.

I won't lie, I did find some use for these cards. There were a few things it taught me that I found very useful and enlightening. However, this is watered down by dozens and dozens of redundant cards, which are a slog to get through. Furthermore, the cards are not good if you have a certain type of logic game that frustrates you, as it's hard to browse all of the reasoning like you could in a book. Furthermore, I had dozens of cards with misprints and errors, with the answer not matching the question. It's a frustration to be sure, and only serves to make one feel even less satisfied with a purchase of the most expensive LSAT tool in Kaplan's library. Don't buy. There are better things for your money.

Like most Kaplan products I've purchased, these flash cards are filled with errors. However, the errors do not substantially detract from their overall usefulness. Without the errors, I would have given this product 5*. For me, these flash cards are as valuable as practice tests, especially the Formal Logic Cards.

I love how I can pop one of the box and study at work this works for me study on the run

Although there are some typos, duplicates and an error or two on the answer side of the card, these cards were are very helpful. They cover all of the game types taught by Kaplan (sequencing, matching, grouping and hybrid) and issues like limited options and numbers. In addition, about 100

cards are dedicated to interpreting formal logic rules when they appear in the games section. However, they do not cover any of the rare game types (mapping, process, spatial, etc.) Overall they helped me understand the rules quicker which allowed me to get through the games at the faster pace. This is a great way to study while on the go without having your nose in a book!

Great logic games.
