# Java How To Program, Early Objects (11th Edition) (Deitel: How To Program)

## Synopsis

For courses in Java programming. Unparalleled breadth and depth of object-oriented programming concepts. The Deitel's groundbreaking How to Program series offers unparalleled breadth and depth of programming fundamentals, object-oriented programming concepts and intermediate-level topics for further study. Java How to Program, Early Objects, 11th Edition, presents leading-edge computing technologies using the Deitel signature live-code approach, which demonstrates concepts in hundreds of complete working programs. The 11th Edition presents updated coverage of Java SE 8 and new Java SE 9 capabilities, including JShell, the Java Module System, and other key Java 9 topics. [Java How to Program, Late Objects, 11th Edition also is available.] Also Available with MyLab Programming. MyLab Programming is an online learning system designed to engage students and improve results. MyLab Programming consists of a set of programming exercises correlated to the programming concepts in this book. Through hundreds of practice problems, the system automatically detects errors in the logic and syntax of their code submissions and offers targeted hints that enable students to figure out what went wrong and why. MyLab Programming improves the programming competence of beginning students who often struggle with the basic concepts and paradigms of popular high-level programming languages. For instructors, a comprehensive gradebook tracks correct and incorrect answers and stores the code inputted by students for review. Note: You are purchasing a standalone product; MyLab & Mastering does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID.
